

April 21, 2020

Dear Stone Residents, Family Members and Staff,

Since the outset of this pandemic, we have tried our best to be as transparent as possible. It is important to note we have made, and continue to make, personal phone calls to the responsible party or healthcare proxy for each resident when changes occurred in their condition or situation.

Our efforts to improve our communication are still a priority and we continue to improve our practices each day. When faced with the difficult conditions we have been operating under over the past several weeks, we always default to putting our resources towards care. Your loved ones continue to be our highest priority.

In line with those priorities, we were an early adopter of testing for our skilled nursing residents to better understand their care needs. We wanted to test all our residents whether or not they were displaying any signs of sickness. As a result, we began testing residents over a week ago with the assistance of the National Guard. We were also allowed to test our staff members as our residents were tested.

Our test results were received in increments. Now that we have a more complete picture, we can share the results. Thank you for your patience during this most difficult time.

Please see the chart which follows for the latest information available. All future updates to it can be found at \_\_\_\_\_ or by using the link \_\_\_\_\_.

Sincerely,

Nicholas Baker, *Executive Director*
